

SENSI

SENSI

Due anime, un unico progetto.

Two souls, one project.

SENSI significa riscoprire la bellezza seducente di materiali senza tempo e collocarla in contesti architettonici anche molto diversi tra loro. La doppia anima della collezione presentata nelle due superfici LUX+ e SABLÈ, la rende libera dai tradizionali clichè legati all'effetto marmo, e aperta alla sperimentazione, proponendo molteplici soluzioni dallo stile assolutamente contemporaneo, in un esercizio progettuale che coinvolge anche i più recenti prodotti del catalogo ABK.

SENSI means rediscovering the seductive beauty of timeless materials and using them in very diverse architectural contexts. The fact that the collection comes in the two surfaces LUX+ and SABLÈ sets it apart from traditional marble-effect clichés and allows for freedom of experimentation. As part of a design approach that includes the latest products in the ABK catalogue, it is ideal for a wide array of solutions with an utterly contemporary design.

SENSI LUX+

glossy surface

L'esclusiva tecnologia LUX+ consente di riprodurre la preziosa lucentezza del marmo levigato su lastre in gres porcellanato di grande formato e di facile collocazione, pensate per il pavimento ed il rivestimento degli ambienti indoor più sofisticati.

LUX COME ELEGANZA Come un abito prezioso SENSI LUX+ veste pavimenti e pareti giocando con gli schemi di posa e con la possibilità di creare differenti combinazioni cromatiche.

LUX COME LUSSO Il fascino delle lastre in marmo selezionate diventa un privilegio accessibile a tutti, la variabilità grafica del prodotto e la particolare ricchezza della superficie permettono di valorizzare ogni spazio con finiture sempre impeccabili.

LUX COME BRILLANTEZZA Le superfici LUX+ si distinguono per un elevato grado di lucentezza, pur mantenendo un'ottima resistenza alle macchie e al calpestio, per coniugare eccellenza estetica a praticità d'uso.

The exclusive LUX+ technology reproduces the elegant sheen of polished marble on large-format porcelain tiles that are easy to install and are designed for use on floors and walls in up-market indoor spaces.

LUX FOR ELEGANCE SENSI LUX+ lends elegance and style to floors and walls, allowing for enormous creativity in terms of installation patterns and colour combinations.

LUX FOR LUXURY The appeal of selected marble slabs is now an accessible privilege, while the graphic variability and rich surface patterns lend prestige and an impeccable finish to any space.

LUX FOR GLOSS LUX+ surfaces stand out for their high gloss level and aesthetic excellence while maintaining exceptional resistance to staining and foot traffic as well as practicality of use.

SENSI SABLÈ

stone surface

Chi è alla ricerca di uno stile più naturale e spontaneo può riscoprire la sensazione materica tipica dei marmi sabbiati grazie a SENSI SABLÈ, un nuovo modo di interpretare il marmo che permette di moltiplicare le destinazioni d'uso del prodotto.

SABLÈ COME NATURALITÀ Grazie alle più evolute tecnologie di decorazione digitale le superfici SABLÈ simulano con estremo realismo i trattamenti di microsabbatura, così come restituiscono sulla superficie ceramica la suggestione delle intrusioni quarzifere presenti nelle venature dei marmi originali.

SABLÈ COME CALORE SENSI SABLÈ trasmette un senso di accoglienza tipico dei materiali "autentici", la sabbatura è un trattamento che non trasforma del tutto l'essenza originale del blocco di marmo, lasciando percepire l'anima primitiva della pietra.

SABLÈ COME VERSATILITÀ La superficie satinata e piacevole al tatto è idonea per qualsiasi tipo di utilizzo in ambiente indoor e si presta a combinazioni stilistiche sempre nuove e sorprendenti.

Those looking for a more natural and spontaneous style can rediscover the material appeal of sandblasted marble thanks to SENSI SABLÈ, a new marble-look concept that expands the product's application potential.

SABLÈ FOR NATURAL APPEAL Thanks to the use of cutting-edge digital decoration technologies, SABLÈ surfaces provide an extremely realistic simulation of fine sandblasting treatment and display the quartz inclusions present in the veins of original marble.

SABLÈ FOR WARMTH SENSI SABLÈ conveys the typical warmth of an authentic material. The sandblasting treatment does not entirely transform the original essence of the block of marble, allowing its true stone nature to shine through.

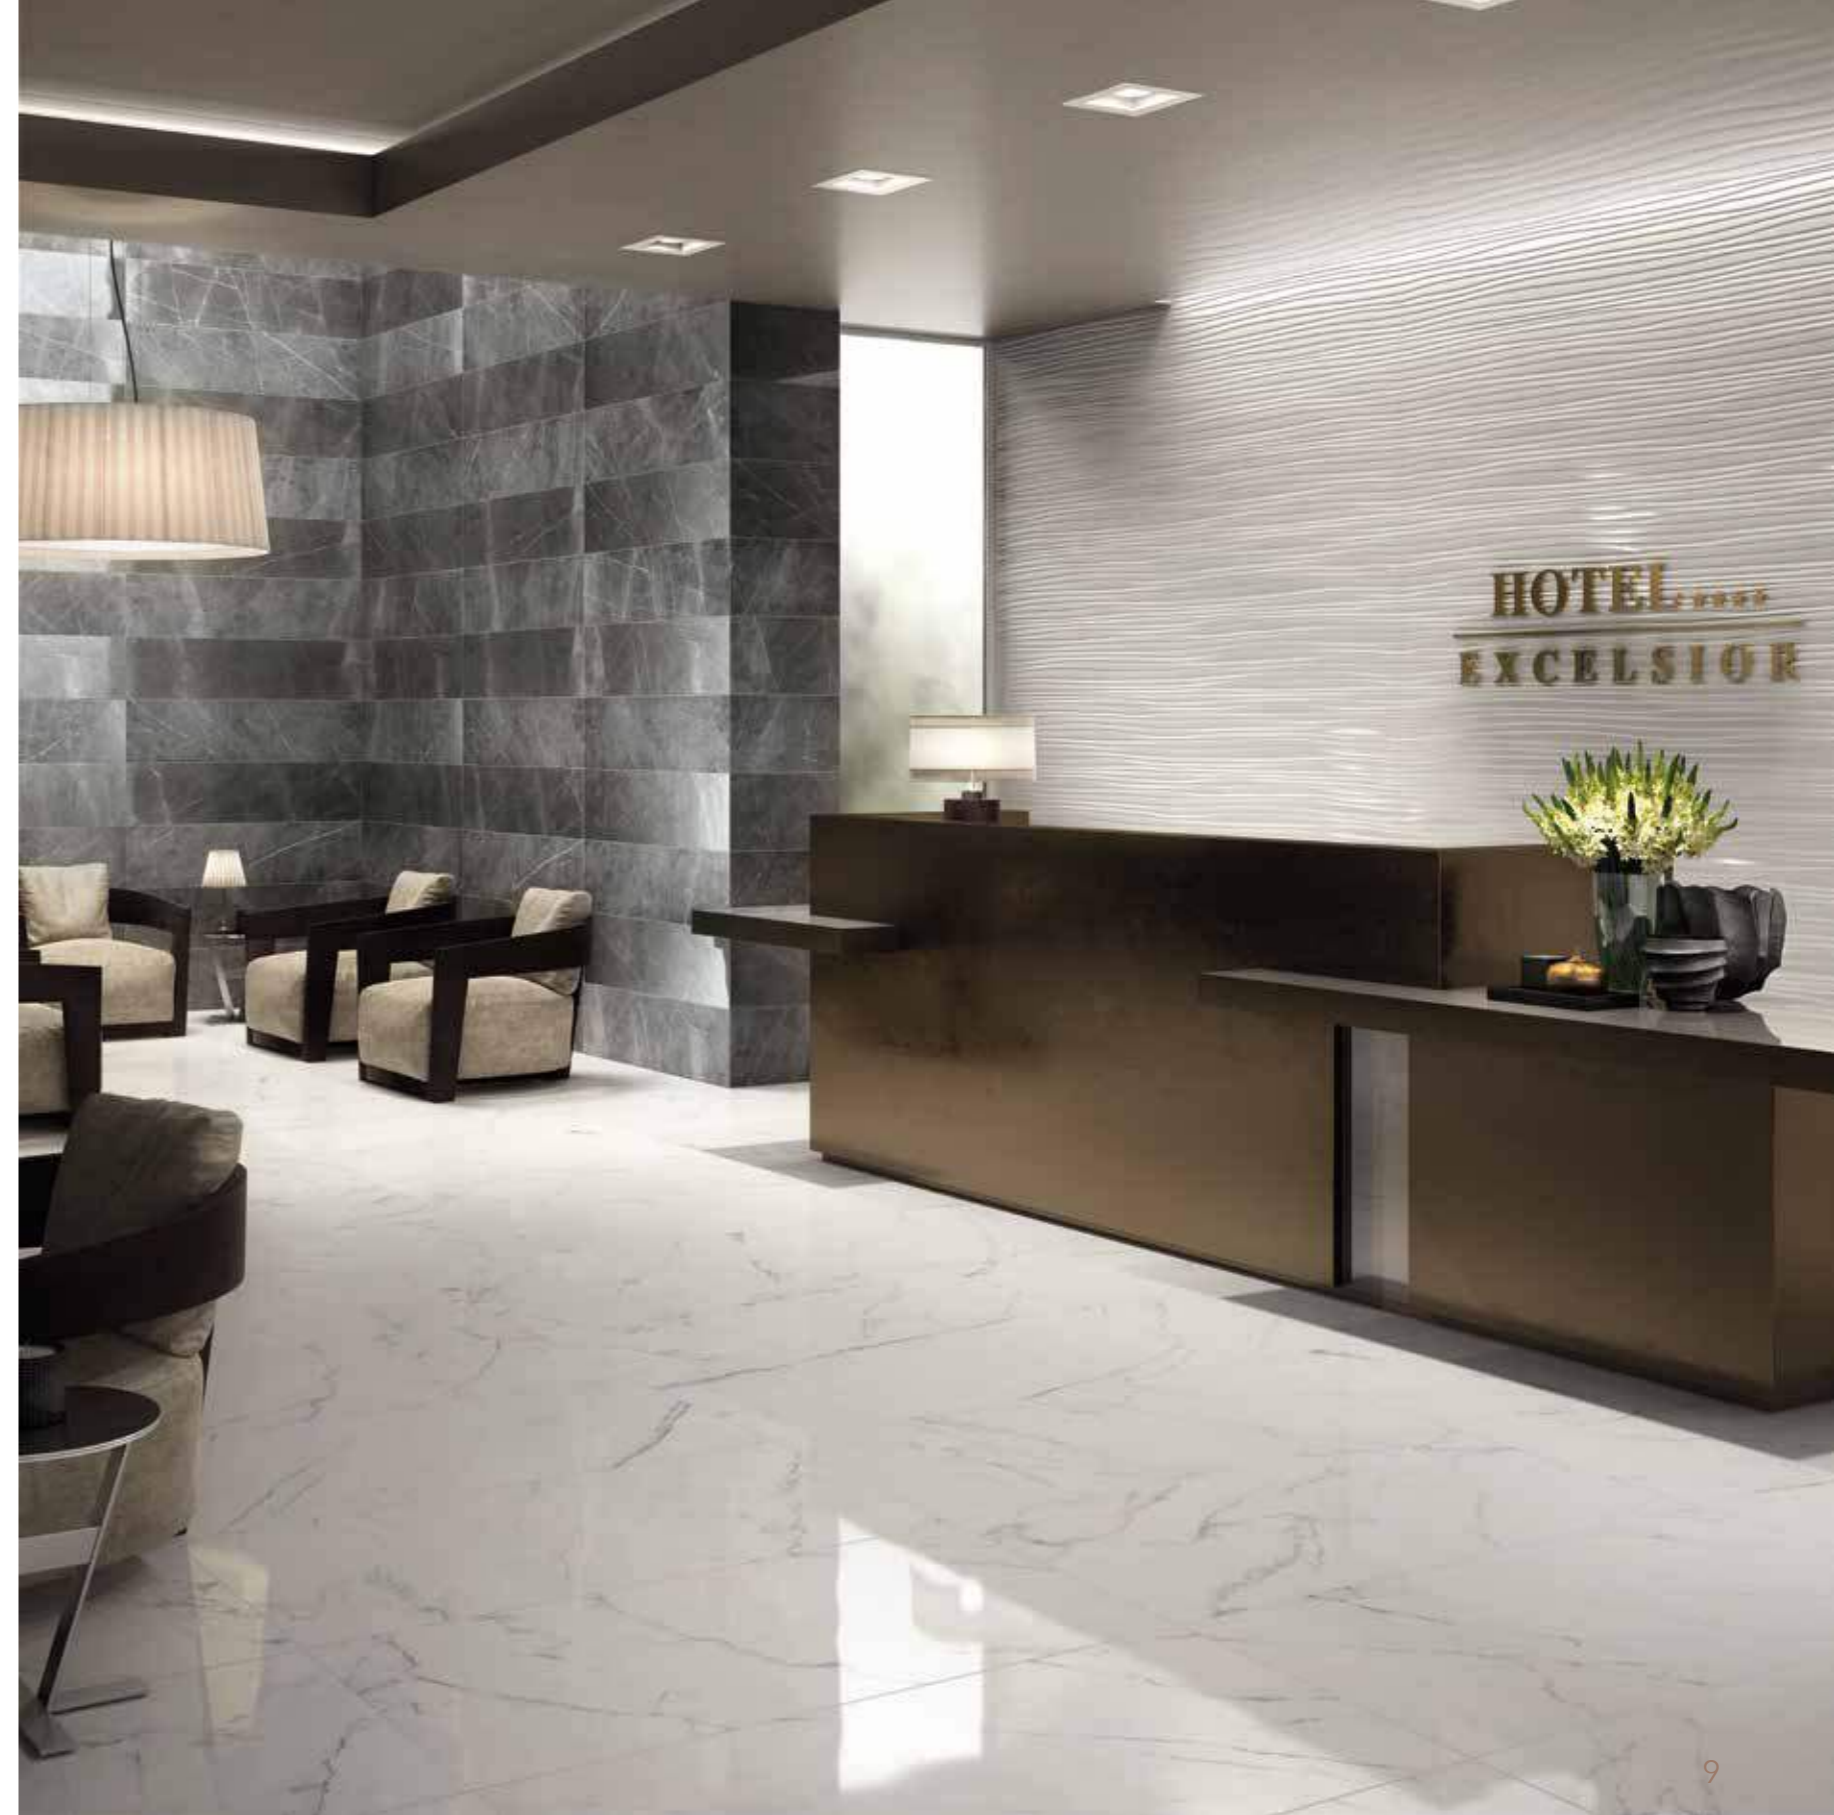

SABLÈ FOR VERSATILITY The soft-touch satin-finish surfaces are ideal for all interior applications as well as for new and surprising stylistic combinations.

SENSI LUX+

In genere, la quasi totalità dei manufatti ceramici presenta una superficie compatta facilmente pulibile, in quanto non vi sono punti dove lo sporco può attaccarsi o incastrarsi. Quando la superficie è lavorata, la situazione cambia e spesso si ha una diminuzione drastica della pulibilità accompagnata da un'elevata sensibilità all'attacco acido. Questo fenomeno, tanto più evidente quanto più è chiara la piastrella, è dovuto in gran parte all'emergere di microporosità in cui lo sporco solido, o comunque non solubile in acqua o nei detergenti, si incastra ingrigendo progressivamente la superficie. ABK con LUX+ introduce un nuovo concetto di finitura superficiale ceramica con cui, tramite un connubio di tecniche applicative e appositi utensili da lavorazione, si può ottenere la completa saturazione della porosità.

In general, the majority of the ceramic tiles presents a compact surface easy to clean, as there are no areas where dirt can attach or get stuck. When the surface is polished, the situation changes and often there is a drastic reduction of the cleanability accompanied by a high sensitivity to acid attack. This phenomenon, the more evident the more it is clear the tile, is due in large part to the appearance of microporosity in which solid dirt, or not soluble in water or in detergents dirt, get stuck and progressively turns the tile surface into gray. ABK introduces LUX+, a new concept of ceramic surface finish with which, through a combination of peculiar application techniques and special polishing tools, you can get the complete saturation of the porosity.

LUX+ EXTRA GLOSSY EXTRA RESISTANT

PIÙ LUCIDA

La finitura LUX+ è in grado di aumentare il livello di lucentezza della superficie oltre i 100 punti di gloss.

MORE GLOSSY

The finishing LUX+ is able to increase the level of surface glossiness of more than 100 gloss points.

SU RICHIESTA

In base alla destinazione d'uso i pavimenti LUX+ possono essere consegnati con l'aggiunta dello speciale trattamento GRIP che ne migliora la resistenza allo scivolamento in base a quanto prescritto dalle norme BCRA C.A. e BCRA G.B: 0,40 < μ LUX+ GRIP < 0,74 ATTRITO SODDISFACENTE

ON DEMAND

Depending on the intended use of the floors LUX+ can be delivered with the addition of a special GRIP treatment which improves the slip resistance according to the prescribed BCRA C.A. and BCRA G.B. standards: 0.40 < μ LUX+ GRIP < 0.74 SATISFACTORY FRICTION.

PIÙ RESISTENTE

La finitura LUX+ aumenta la resistenza della superficie alle macchie. Questa è da intendersi sia come ripulibilità della superficie da pedate e macchie di vario genere, sia come resistenza all'attacco acido e all'usura determinata dal calpestio nel tempo.

MORE RESISTANT

The LUX+ finishing increases the surface stains resistant. This is to be understood both as cleanability of the surface to treads and stains of various kinds, both as acid and wear resistance determined by the traffic over the time.
