

The background features a dark grey, textured surface. A diagonal band of parallel, golden-yellow lines runs from the top-left towards the bottom-right. The remaining areas are filled with a pattern of scattered, golden-yellow circles of various sizes, creating a polka-dot effect.

Collections

ITE prende ispirazione dal profondo legame storico e sociale tra Ceramica Mediterranea e le Miniere di Montevecchio. Il progetto trascende le iconiche immagini dell'artigianato e della cultura Sarda, per concentrarsi sulle origini del territorio e sul suo DNA, diventando un' immersione nel mondo dei minerali e nelle loro geometrie. Immaginate come affascinante grafica e sistema visuale composito, le strutture cristalline si trasformano in un mondo ricco di significati concettuali e arcaici interpretato attraverso la contemporaneità. Innovativo ma di facile lettura, il design ha un'anima minimale ed un'estrema versatilità che rende i prodotti facilmente integrabili in contesti commerciali e residenziali. Le scelte cromatiche sono studiate sui colori spesso presenti nella natura e nelle architetture della Sardegna, toni caldi con contrasti e inaspettate sfumature materiche.

ITE draws inspiration from the social and historical ties between the Company and the Montevecchio Mines. The project wants to transcend the iconic imagery of the craft and culture of Sardinia to focus on the origin of the land and its DNA through a captivating journey in the world of minerals and its geometry. Thought as a graphic and visual system, the crystal structures transform into a rich world of archaic and intellectual symbology viewed through the contemporary. Original yet accessible, the design sports a minimalistic soul and versatility, featuring products created with residential and commercial spaces in mind. The colour palette blends shades that are part of the Sardinian landscape with hues commonly found in the island's architecture. Warm, earthy tones juxtapose unexpected materic contrasts.
